

Get Component list

Request URL : <https://open.jlcpcb.com/overseas/openapi/component/getComponentLibraryList>

Request Type : POST

Interface Description:

Paginated query for the listed component data, supporting large-volume data pagination.

Request Parameters :

Parameter Description :
Header Parameters

Parameter name	Type	Required	Description
Authorization	String	Yes	Signature authentication Generate authentication data
Content-Type	String	Yes	Please set it to application/json
Accept	string	Yes	Please set it to application/json

Body Parameters

Parameter name	Type	Required	Description
pageSize	Integer	Yes	Page size, the default value is 30
lastKey	String	No	The last item on the current page serves as the key to retrieve the next page's data

Code Example:

```
OkHttpClient client = new OkHttpClient().newBuilder().build();
MediaType mediaType = MediaType.parse("application/json");
RequestBody body = RequestBody.create(mediaType,
"{\"pageSize\":100,\"lastKey\":\"ubYoSfARDyd74EPob5BYUPu+tjNN8513mTE1nw/GDH3OPh8lgrrENTIEtt44+S/08WE/U0J1iUmfex3m5mvWPRvKSu9Fmt2jscj0cwia/spvy/7YgSbpJiYp1tFMNLC6FLb1UYAgxxP4xoDxvQ8gYhegLQKcwt6PKVqYesLUPE=\"}");
Request request = new Request.Builder()
    .url("https://your-domain.com/overseas/openapi/component/getComponentLibraryList")
    .method("POST", body)
    .addHeader("Content-Type", "application/json")
    .build();
Response response = client.newCall(request).execute();
```

Response Data:

```
{
  "code": 200,
  "data": {
    "componentLibraryInfoVOS": [
      {
        "componentModel": "GZ1608D601TF",
        "componentCode": "C1002",
        "componentSpecification": "0603"
      },
      {
